

The role of local communities is crucial to the management of traffic congestion across Sydney.

The move to identify possible clearways and the subsequent introduction of a clearway into a local community relies upon community feedback.

Therefore community engagement and consultation is a vital part of the Clearways Strategy.

In order to help Transport for NSW and Roads and Maritime Services understand community issues a number of consultation channels are being established for the community to have a say.

These include:

#### **Comments on the Sydney Clearways Strategy**

- Feedback on the Strategy can be made before 7 February 2014 to:

*Sydney Clearways Strategy*

Transport for NSW

GPO Box K659

HAYMARKET NSW 1240

- or by email to:

[sydneyclearways@transport.nsw.gov.au](mailto:sydneyclearways@transport.nsw.gov.au)

#### **Comments on specific clearways projects**

- The Roads and Maritime Services (RMS) website provides the community with information on specific proposed clearway routes and for comments to be recorded.

[www.rms.nsw.gov.au/clearways](http://www.rms.nsw.gov.au/clearways)

- Roads and Maritime Services have already started consultation on the proposed Victoria Road clearway, this will continue before any changes are made.

From early 2014 Roads and Maritime Services will begin to consult on the four other priority clearways including door knocking, letter drops, newspaper advertisements, and community information sessions to interact with local communities located at:

- Lane Cove Road, North Ryde to Macquarie Park;
- Mona Vale Road, West Pymble to St Ives;
- King Georges Road, Beverly Hills to Greenacre; and
- Princes Highway, Kirrawee to Blakehurst

#### **Nominating possible clearways for consideration**

- The community can also have a say in where new or extended clearways could be considered.

The *Nominate a Clearway* website provides an interactive mapping tool on the site for users to identify where and when they consider a clearway should be established and to provide direct feedback on these nominations.

Currently there are over 170 sections of road covering 780 kilometres with clearway restrictions in operation across Sydney. The Sydney state road network totals about 2800 kilometres.

Given the size of the network, it is important we seek out and listen to your views.
