## Notes

- \* Some projects have \$0 in 2018/19 – these projects have been approved now to begin delivery in 2019/20. This forwarding programming gives Roads and Maritime Services or local councils' time to further develop the approved project and/or integrate and coordinate the project with other program areas.
- The scope of projects (location, treatment type, cost and completion time) are subject to change throughout the year.
- The cost of projects can vary based on a number of factors such as treatments selected, constraints in the road environment (e.g. geo-technical, topographical, environmental, sustainability, engineering), location and procurement. These are site-by-site considerations.
