### New red-light speed camera locations - Metropolitan NSW

As part of the NSW Speed Camera Strategy, the number of intersections with red-light speed cameras will increase from 91 to 200 intersections.

Cameras are installed at locations that meet the criteria in the NSW Speed Camera Strategy. Site selection includes both crash analysis and thorough assessment of the site to ensure that installation of a camera is appropriate.

Since April 2013, a total of 21 new locations have been approved for the installation of red-light speed cameras across metropolitan NSW. The locations are listed below.

Cameras will be installed and activated over the next six months. All new red-light speed camera locations include enhanced warning signage and a four week warning letter period.

Drivers are advised to observe the posted speed limit at all times.
