

Safer Roads NSW

Changes to permanent speed limits

Transport
for NSW

8 May 2014

Hunter

The changes below are anticipated to take effect in the following two weeks.

Speed limits are set for all roads in NSW in accordance with the NSW Speed Zoning Guidelines. The changes outlined in the table below have been recommended following the completion and approval of a speed zone review by authorised speed zone officers.

This is advanced notice of a proposed speed limit change, however no change will occur until the relevant speed limit signs are changed.

Please ensure that you always observe the posted speed limit signs on the road.

Road name	From	To	Local Government Area	Current speed limit km/h	New speed limit km/h	Reason for change
Main Road (eastbound), Edgeworth	190 metres west of Dunbar Road	400 metres west of Frederick Street	Lake Macquarie	70	60	This will reduce the number of speed zone changes along this route to provide a simpler and safer road as well as providing a speed limit which is more appropriate for the level of roadside development.
Main Road (westbound), Edgeworth	190 metres west of Dunbar Road	231 metres west of Frederick Street	Lake Macquarie	70	60	As above
