

# Safer Roads NSW

## Changes to permanent speed limits

Transport  
for NSW

8 May 2014

### Western

The changes below are anticipated to take effect in the following two weeks.

Speed limits are set for all roads in NSW in accordance with the NSW Speed Zoning Guidelines. The changes outlined in the table below have been recommended following the completion and approval of a speed zone review by authorised speed zone officers.

This is advanced notice of a proposed speed limit change, however no change will occur until the relevant speed limit signs are changed.

**Please ensure that you always observe the posted speed limit signs on the road.**

| Road name             | From  | To  | Local Government Area | Current speed limit km/h | New speed limit km/h | Reason for change  |
|-----------------------|---|---|-----------------------|--------------------------|----------------------|--|
| Wolgan Road, Lidsdale | 3.5 kilometres north of Blackfellows Hand Track | 100 metres north east of the entrance to the Wolgan Valley Resort | Lithgow               | 100                      | 80                   | This speed limit change better reflects recent development and improves safety for residents and road users. |
